

HOSTEDBIZZ ADVANCED MPLS NETWORK SOLUTIONS

CARRIER AGNOSTIC SEAMLESS NETWORKING BETWEEN MULTIPLE LOCATIONS

Make the move to HostedBizz Network Solutions to leverage the benefits of MPLS over multiple carrier networks

About HostedBizz

HostedBizz is Canada's fastest growing, premier cloud Infrastructure as a Service (IaaS) provider.

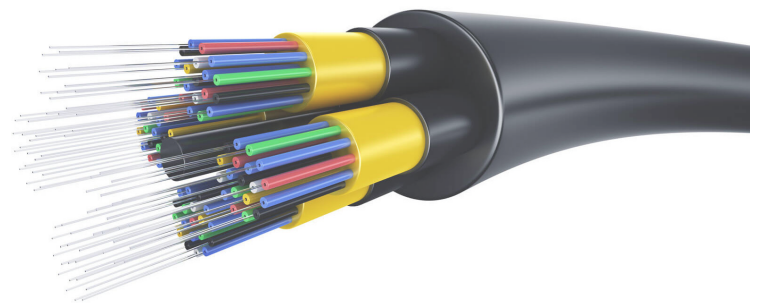

The HostedBizz, cloud infrastructure provides an integrated suite of IT infrastructure services including cloud servers, backup, disaster recovery, file sharing and private network access.

MPLS Network Solutions are a core part of our portfolio allowing us to offer cost effective networking, internet access and private connectivity into the HostedBizz Cloud.

HostedBizz are committed to investing in and providing the latest cloud based technologies to Canadian businesses. We want to make it easier for organizations to access enterprise grade IT services that deliver reliable, scalable and flexible solutions at affordable costs.

All HostedBizz networks use Multiple Label Switching, (MPLS) to ensure high performance for real time solutions to ensure the highest network performance for your critical applications and internet requirements. HostedBizz can connect all of your locations, employees and applications onto a single wide area network. Our MPLS solutions offer Quality of Service (QoS) for your mission critical applications. You can also take advantage of many redundancy options across multiple service providers to ensure your business is always operational.

The HostedBizz core network infrastructure connects and aggregates carrier MPLS networks into a multi-carrier, best-of-breed MPLS network with coverage across Canada and Internationally. The convergence of voice, video and diverse grades of data onto a single network will inevitably improve performance and will likely provide cost savings. With HostedBizz MPLS connections it has never been easier to build an intelligent network, with architected flexibility. HostedBizz simplify your network requirements, by managing, monitoring, and customizing multiple carrier services to suit your individual requirements.

Access Options

Fibre-optic 10 Mbps
Fibre-optic 100 Mbps
Fibre-optic GigE
Fibre-optic 10GigE
10 Gbps & 100 Gbps
ADSL
Wireless
Ethernet over Cable

The HostedBizz Advantage

RELIABILITY

99.9% network access uptime with multi-carrier redundancy and automatic fail-over. You can feel secure with premium service level agreements which satisfy industry key leading performance metrics

PERFORMANCE

Built-in QoS priority for your voice traffic and other critical applications without additional fees. You will experience much lower latencies than traditional public networks

FLEXIBILITY

Customized configurations to optimize your network routing, redundancy, and bandwidth for MPLS applications, Layer-2 replication, and Internet access. No matter where your business is located or what types of services you are running our MPLS solution can unify your network design and provide you with a wide range of choices that meet your bandwidth and budget needs

INCREASED PRODUCTIVITY

With a securely connected, single network, you will benefit from faster communication and information sharing. You will have the support in place to allow for advanced applications such as videoconferencing and collaboration tools

SUPERIOR

Support and Service: 24/7 pro-active monitoring and support with fast response times and detailed network reports. HostedBizz customize, manage, and monitor the Carriers for you, so that you can focus on your core services.
