Veeam Cloud Connect – Adding a Service Provider

Adding the Service Provider

Once you have Veeam Backup and Replication installed, you will need to add the Service Provider account provided by HostedBizz.

1. Proceed from the "Home" screen to "Backup Infrastructure".

2. Select "Service Providers" in the left column, and then select the "Add Provider" button in the top left corner. It's worth noting you can have more than one Service Provider if you use Veeam Backup and Replication for other tasks.

П НОМЕ	
BACKUP INFRASTRUCTURE	

3. A new window will open up allowing you to setup the Service Provider. In the "DNS name or IP address" field enter the DNS provided by HostedBizz, this is usually either "hostedbizz.vmbackup.ca" or "hostedbizz-west2.vmbackup.ca".

Leave the port as default, 6180. The description can be altered or left as default. Select "Next >" to proceed.

Service Provider	×
Service Provider Type in DNS name o provider, add a cust	r IP address and a port number received from the service provider. If you are using more than one service om description to more easily distinguish between them.
Service Provider	DNS name or IP address: Port:
Credentials	hostedbizz.vmbackup.ca
	Description:
Apply	Created by VEEAM\Administrator at 11/7/2019 3:54 PM.
Summary	
	_
	✓ Allow this Veeam Backup & Replication installation to be managed by the service provider
	select this check box if you have managed backup contract with the service provider you are adding, and want to allow it to manage your installation remotely.
	< Previous Next > Finish Cancel

4. Next you will need to select "Add..." to add the credentials provided by HostedBizz.

Service Provider				
Credentials Specify credentials that you have received from the service provider, and validate the certificate.				
Service Provider Credentials	You have connected to service provider office365.vmbackup.ca <u>CN=Go Daddy Secure Certificate Authority - G2</u>			
Apply	Verified by: <u>OU=http://certs.godaddy.com/repository/, O="GoDaddy.com, Inc.",</u> L=Scottsdale, S=Arizona, C=US			
Summary	Certificate is verified by third party.	, 		
	Add or select credentials issued to you by the service provider Credentials:			
	Add Manage accounts			
	< Previous Apply Finish Canc	el		

5. Enter the username and password provided. You may enter a description if you wish. Once complete select "OK".

Credentials			
	Isername:		
	OK	Cancel	

6. Once you have entered the credentials, you will see them in the "Credentials" window. Next select "Apply" to proceed.

Service Provider			
Credentials Specify credentials th	at you have received from the service provider, and validate the certificate.		
Service Provider Credentials	You have connected to service provider office365.vmbackup.ca <u>CN=Go Daddy Secure Certificate Authority - G2</u>		
Apply	Verified by: <u>OU=http://certs.godaddy.com/repository/, O="GoDaddy.com, Inc.",</u> L=Scottsdale, S=Arizona, C=US		
Summary	Thumbprint: Certificate is verified by third party. Verify Verify Add or celect credentials issued to you by the censise provider.		
	Credentials:		
	R test (test, last edited: less than a day ago)		
	<u>Manage accounts</u>		
	< Previous Apply Finish Cancel		

You will then see a window indicating the credentials are being validated.

PLEASE WAIT	
Establishing connection to the service provider	

If the service provider address was correct and the credentials were entered correctly you will proceed to the next step.

7. On the "Backup Storage" page, no data needs to be entered, however, you will see the repository friendly name as well as the capacity and if a WAN Accelerator has been enabled. Select "Apply" to continue.

Service Provider			×	
Backup Storage The following are off-site backup repositories assigned to you by your service provider.
